The bank´s vision is to be the provider of financial services for Argentine households, families and companies: efficient and digital, recognized for its excellence in customer service, promoting a culture focused on people, decision-making based on data and characterized by a positive social footprint.

The second objective focuses on people´s development within an agile and flexible culture, supported by decisions based on data and promoting a positive social impact. And the last strategic focus is about efficiency and profitability, sustainable and supported by a balanced and competitively funded business.

The key results that measure these strategic focuses are: Global NPS, digital channel satisfaction index, job satisfaction index, positive social footprint index, ROE, efficiency, NPL, Demand deposits/liabilities and net profit.
